Several security devices can be found that use cables and locks for securing electronic devices and other valuables. Still others use electrical circuitry and power sources to provide a visual or audible alarm in case of intrusion. However, there is no prior art device that includes a housing having a passage therethrough, a power source, and a movable lock plate over the power source wherein the passage and opening are aligned and when the cable is routed through the passage and the opening, the lock plate cannot be removed and thus the power source is inaccessible.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
